

# HOW DOES HOME HEALTH HELP A PHYSICIAN'S OFFICE?

- Home Health serves as an extension of physician's office by
  - ↑ Improving adherence to the prescribed care plan and medication regimen
  - ↑ Keep patients recovering at home and out of hospital
- Helping maintain independence of patients and reducing frequent and unnecessary calls or visits to your office
- Providing frequent updates to your office and helping patients keep ongoing appointments with your office. We try to be their first call.
- We serve as an extension of your education process that you initiate in the hospital / clinic

**We are an extension of your team and serve as your eyes and ears in patient homes**
